----

Self-taught programmer looking to transfer twenty years of retail experience into a career in software engineering. I am a motivated self-starter and an engaged team player. I'd bring a new perspective and a natural curiosity to your team.

RELEVANT PROJECTS

----

rpu   *Built with Bootstrap, Font Awesome, EJS, Node.js, Express, Mongoose, MongoDB, Heroku*
Full-Stack Web App
- Users create a character and give it skills that they want to develop in real life. After practicing their skills, they make a post about it and their character levels increase.
- Keeps users engaged with the skill building process using reward mechanics.

SimpleKarma   *Built with Node.js, ESLint, Mongoose, MongoDB, GitHub Actions, Discord API, Heroku*
Discord Karma Bot
- Manages keywords and their point value through chat commands. Keywords are tracked persistently and are unique to their server of creation.
- Automates the tracking of points systems for a Discord server.

BattleBot   *Built with Ruby, Bundler, RSpec, RuboCop, YAML, Discord API, Heroku*
Discord Battle Bot
- Discord users can fight each other by using "challenge" and "accept" commands. The bot then calculates a log of the battle based on the user's stats and displays it in chat.
- Fun!

YouTube Crossposter   *Built with Node.js, YouTube and Reddit APIs*
Automated Video Crossposter
- Uses a crontabs schedule to automatically retrieve the most recent video data from a YouTube channel, check if the data is new, and then post the data to a subreddit.
- Automates marketing of your videos, saving time and eliminating soul-crushing work.

EDUCATION

Self-Directed Learning   *2020 - Present*
     APIs • SEO • Git • Github • Ruby(Basics) • Linux • VSCode • Sass(Basics) • TDD • Agile

Udemy   *2021*
The Web Developer Bootcamp by Colt Steele
     HTML(Intermediate) • CSS(Intermediate) • Javascript(Intermediate) • DOM • Bootstrap • EJS
     Node.js • Express • REST • NoSQL • Mongoose • MongoDB • User Auth • Deployment • Heroku

University of Helsinki Massive Open Online Courses   *2020*
Object-Oriented Programming with Java
     IDEs • Java • Object-Oriented Programming
